Many user reviews are dismissive of this movie due to the differences between it and original novel. But I say, who cares! I've never read the book, but I've seen a 1990's movie version that's more faithful, with the inclusion of the Ginger story story So go and watch that and stop moaning! I found this an incredibly moving story and I enjoyed Black Beauty's journey, which goes full circle in a sad but somewhat rewarding way, which is enough to leave you with a sense of contentment, albeit with a tear in your eye. This movie crazes a lot in its 90 minutes, and the pace is fast, but somehow it gives the viewer time to enjoy the emotional path our equestrian hero is thrust along, including all the ups and downs he has to endure. Highlights for me are when Beauty ends up on the continent after being sold to a traveling circus, and then gifted to a humiliated hussting by his estranged lover, becoming in the process a war hero, after the horse charges with his mortally wounded master in the enemy cannon. More sad times follow as Beauty is brought and sold, eventually almost decaying due to its poor treatment, but just as the old horse drags heavy coals down a steep road, and the weary animal is close to death, redemption finally comes. The last words are very sad, because it makes you feel that so much of the horse's life has been used without real joy, and yet we see the old warrior sent to pasture in a field where horses live their last days. I wish more movies were made like this today, the music is very good and relies on the wide hills and mountains that feature so prominently (Ireland and Spain were used as the filming locations) 1 out of 1 found this useful.
